

## AgrimagP2

Arkon Flow Systems is happy to inform you that we are launching the new version of the Agrimag series flowmeter. Using your feedback that you have provided us, our R&D department has been working hard, not only to improve its performance but also to add new features that simplifies remote integration.

We are proud to offer you the new version of AgrimagP2, which includes new specifications like Modbus RTU communication, 4-20 mA output and internal data logger.

Features:

- Electromagnetic flowmeter with its basic but most sufficient operation
- 4-20mA loop for easy connection with your current system
- RS485 based MODBUS RTU for easy SCADA connection
- Digital data logger - up to over 131 072 records at lowest 15 seconds sampling
- Output to .csv file (readable by Excel)
- New AgrimagP2 software free of charge

With this new version we expect to fulfill all your requirements.

Special discount of up to 30% for all orders of AgrimagP2 till the end of July 2016.

### Visit us at IFAT 2016 exhibition

We are glad to inform you about our recent marketing activities and invite you to our stand at the World's Leading Trade Fair for Water, Sewage, Waste and Raw Materials Management, exhibition IFAT 2016 in Munich. Please feel free to share this information with your own customers and contacts who may be interested in visiting our stand.

May 30 – June 3, 2016

Messe München, Germany

Hall A5, Stand 122
